RE: Rodent Control Programs, New Castle County Landfills

Dear Robert:

This is to keep you up to date about rodent control measures at the Llangollen and Tybouts landfill sites.

At the Llangollen site, Orkin Exterminating Company is working and we have signed a contract to continue this work through May, 1969. They report good progress, however, it appears that the rodent population was less than we originally thought. Orkin's work covers the entire site.

To start with, at Tybouts Corner, the County rodent control man, Mr. Wayne Corbin, will inspect the site three times a week. If any activity is observed, a program of baiting will be started. The chemical used will be Warfarin, as outlined in your specifications.

I will keep you informed if any problems develop. Please call if you have any questions.

Sincerely yours,

George W. Dutcher  
Director of Public Works
